## Kronecker Quote

*“The wealth of your practical experience  
with sane and interesting problems  
will give to mathematics  
a new direction and a new impetus.”*

*– Leopold Kronecker to Hermann von Helmholtz –*

# Purpose

My (personal) hope for the workshop is expressed in this long-ago planning comment:

“For this workshop, our desire is to have talks that address (in whatever way the speakers feel is appropriate) the fundamental issue of what is the mathematical space in which we should represent documents (for subsequent analysis/processing), as opposed to, for example, what should be that for subsequent analysis/processing.”

While my hope may be in vain ... hope springs eternal!
